Re: WT Docket No. 02-55; Written Ex Parte Presentation

Dear Chairman Powell,

Our company is the holder of several Part 90 800 Mhz general category licenses that are used in the operation of our business. Our operations have never caused harmful operation to any Public Safety licensee. We strongly believe that this Commission should adopt a method of ameliorating harmful interference that other licensees are causing to Public Safety in some regions of the country which avoids undue disruption to innocent licensees such as ourselves and which targets the cure to the problem.

At its heart, interference is a local issue and cannot be solved by a one-size fits-all solution. Accordingly, we wish to register our strong opposition to the Nextel mandatory rebanding proposal (misnamed as a “consensus” plan), and our support of the competing “Balanced Approach” proposal that was put forth in this proceeding by a collation of the United Telecom Council, Small Business in Telecommunications and others. Please add our company to the list of those commentators that now support the “Balanced Approach” plan.

Sincerely,

Agnes Pennington
